Accomplishments

Adobe Design Awards Semifinalist
MAD (Made a Difference) Award,
RBC IBM Enterprise Design Thinking

Product Designer

Jan.2021 - Present

@ Microsoft, Suzhou, China

Working in the CMD China design team, I am designing 0-1 features that impact millions of users. I explore and discuss early-stage design solutions with PMs and validate concepts through user study. Present study insights and solutions to senior team leaders to ensure the solution truly resonate with user's mental model and address their pain points.

Communicate my design concepts to both internal and external stakeholders to achieve alignment and sign-off. Being an accountable and responsible team member, my work quality and work ethic have been well-recognized by global partners.

Work closely with engineer teams and host bug bash/QA sessions to ensure successful design implementation. Think through all the edge cases and push the engineering quality toward pixel-perfect design implementation.

UX Design Intern

Jan.2020 - Apr. 2020

@ ecobee, Toronto, Canada

Contribute to the hardware UI improvement project by analyzing customer insight from NPS and drive the internal remote usability testings sessions.

Collaborate with PMs, researchers, content writers and developers to revamp the existing ecobee products. Create development-ready design assets (iOS and Android) for the development team.

UI/UX Design Intern

May. 2019 - Aug. 2019

@ Royal Bank of Canada, Toronto, Canada

Nominated by my team for a MAD (Made a Difference) award. My work has been praised by executives, managers and my colleagues, and also helped the team obtain more than 100K executive buy-in.

Create compelling designs that bring high-level business concepts to life. Quickly incorporate feedback from all the stakeholders and work on multiple projects simultaneously under tight deadlines.

Propose multi-modal solutions based on user testing to improve the UX of a robotics project and ensure a successful launch to the experience store.

UI/UX Designer

Oct. 2018 - Mar. 2019

@ CrueTV & OCADU, Design4 Program

Conduct user research to identify existing pain points and create conceptual artifacts such as business model, journey map, user persona to present the research outcome and visualize the business model for the stakeholders.

Develop information architecture, low fidelity mockups to communicate concepts and design rationales. Design a web system to facilitate
